

Federal PARKING

Federal Parking offers comprehensive parking services for stand-alone and integrated garage facilities and surface parking lots. With experience in parking programming, garage design, construction, facility operations and property management, our knowledgeable team of parking specialists provide customized solutions designed to provide long-lasting value.

We work closely with the owners of proposed or existing facilities to identify capacity needs and deliver state-of-the-art, operationally efficient and well-designed structures in urban office towers, mixed-use centers, airports and medical campuses. Through cost containment strategies and quality control oversight, we deliver durable and efficient structures.

We offer competitive rates and creative structuring for project design, development, finance, operations and turnkey project development management of garage facilities, including a full complement of services including:
